HONORING ENGINEERS
BUILDING SUSTAINABLE BANGLADESH

16319

LAFARGEHOLCIM BANGLADESH PLC. AT A GLANCE

Chhatak Plant, LafargeHolcim Bangladesh PLC.
Only Integrated Building Material Plant of Bangladesh.
Sunamganj, Sylhet

LafargeHolcim Bangladesh PLC. (the Company) a member of Holcim Group based in Switzerland and Molins of Spain which has been operating in Bangladesh for more than two decades. The company has invested approximately US\$500 million to establish one fully integrated building material plant in Chhatak, Sunamganj, along with three grinding stations in Narayanganj, and Mongla. This is the highest foreign direct investments in Bangladesh's construction materials sector. As part of global leaders in innovative and sustainable building solutions, LafargeHolcim Bangladesh is committed to enabling greener cities, smarter infrastructure and a more sustainable built environment in Bangladesh. The company is advancing the principles of the circular economy through its Cement, Aggregates and Geocycle businesses, promoting resource efficiency, responsible material use and innovative approaches to sustainable construction. With sustainability at the core of its strategy, LafargeHolcim Bangladesh is working towards a net-zero future, while placing its people, communities and the environment at the heart of its long-term growth. Through its commitment to innovation, sustainability and responsible development LafargeHolcim Bangladesh continues to contribute to building a stronger, more resilient and sustainable Bangladesh.

HOLCIM STRUCTURAL EXCELLENCE AWARDS (HSEA)

The Holcim Structural Excellence Awards 2026 (HSEA 2026) is a dedicated platform honoring high-impact achievements in structural engineering, technical innovation, and sustainable construction across Bangladesh. Rooted in Holcim's global mission to advance sustainable development, the awards recognize the extraordinary engineers and project teams whose expertise, vision, and creativity continuously elevate national engineering standards.

As Bangladesh navigates rapid urbanization and evolving infrastructure needs, HSEA 2026 plays a vital role in setting new benchmarks for the construction industry. By championing low-carbon design, climate resilience, structural efficiency, and material optimization, the awards inspire the industry to embrace responsible resource management. HSEA 2026 serves as a catalyst for progress, driving the transition toward a smarter, safer, and more resilient urban future for the entire nation.

OUR STRATEGIC INTENT

By connecting global sustainability principles with Bangladesh's engineering expertise, the HSEA 2026 seeks to establish a new benchmark for structural excellence, innovation and responsible construction.

Establish a national platform for recognizing outstanding structural engineering achievements.

Champion innovation, resilience and sustainable engineering in the built environment.

Promote resource-efficient and low-carbon construction practices through optimized structural solutions.

Encourage knowledge exchange among structural engineers, academia, industry and other construction professionals.

Inspire the next generation of structural engineers to pursue excellence, creativity and professional leadership.

Holcim
STRUCTURAL
EXCELLENCE
AWARDS 2026

WHY HOLCIM STRUCTURAL EXCELLENCE AWARDS

DRIVING SUSTAINABILITY

01

Promote low-carbon, resource-efficient and environmentally responsible structural solutions that support sustainable development throughout the project life cycle.

FOSTERING INNOVATION

02

Recognize innovative engineering solutions and emerging technologies, including advanced structural systems, BIM integration, modular construction and next-generation materials.

RECOGNIZING EXCELLENCE

03

Honor exceptional technical competence, structural design, material efficiency, constructability and engineering ingenuity, guided by international codes and best practices.

ADDRESS CLIMATE CHALLENGE

04

Promote structural solutions that enhance safety, durability and resilience against earthquakes, climate-related hazards and the evolving challenges of urbanization.

BUILDING KNOWLEDGE

05

Bridge industry, academia and professional practice by encouraging knowledge sharing, technical dialogue and the wider adoption of proven engineering innovations.

INSPIRE & ENGAGE

06

Showcase exceptional projects and the engineers behind them, inspiring young professionals to pursue excellence, innovation, sustainability and professional leadership.

AWARD CATEGORY

HIGH PERFORMANCE CONCRETE STRUCTURE

- Exceptional strength, durability and structural performance
- Optimized mix design and innovative material solutions
- Structural efficiency, safety and serviceability
- Advanced quality control and excellence in project execution
- Enhanced durability against chloride, sulfate and other severe environmental exposures

ADVANCED CONSTRUCTION TECHNOLOGY & CIRCULARITY

- Innovative construction technologies, methods and processes
- Efficient application of recycled, low-carbon and sustainable materials
- Waste minimization and circular resource utilization
- Resource-efficient construction with measurable environmental benefits

NEXT GENERATION/VISIONARY DESIGN

- Innovative, resilient and future-ready structural design approaches
- Creative solutions to complex engineering challenges
- Integration of emerging technologies and advanced engineering practices
- Demonstrable impact on safety, efficiency, sustainability and constructability

LEGENDARY STRUCTURAL ENGINEER AWARD

- Lifetime achievement and excellence in structural engineering
- Outstanding contributions to structural design, innovation, research, education or professional practice
- Significant and lasting impact on the engineering profession and the built environment
- No submission required. Recipient will be selected by the Jury.

TECHNICAL FOCUS AREA

Compliance with BNBC

Structural detailing

Reducing carbon footprint & circularity

Use of advanced concrete solution

Value engineering

Contribution to national development

Economic & infrastructural impact

HSEA EVALUATION CRITERIA

Each category should be judged **independently on a 100-point scale**.

Criteria	Category 1	Category 2	Category 3	Grand Winner
Design & Technical Excellence • Technical quality • Safety • Performance • Compliance	30	30	25	20
Innovation & Optimization • Originality • Advanced Solutions • Optimization	10	15	25	20
Sustainability & Environmental Performance • Material Efficiency • Durability • Embodied carbon • CO2 reduction	20	20	20	25
Constructability & Practical Implementation • Construction technology • Feasibility • Buildability	15	15	10	10
Circularity & Resource Efficiency • Resource • Recycling • Upcycling • Resource conservation				15
Life- Cycle Cost & Value Engineering • Cost • Operation • Maintenance and long-term value	10	10	10	10
Presentation & Documentation	15	10	10	
TOTAL	100	100	100	100

***Result:** The highest-scoring project in each category becomes the **Category Winner**.

***COMBINED GRAND WINNER EVALUATION**

Category 1 & 2 winners will be reassessed using the Grand Winner criteria.

ELIGIBILITY CRITERIA

Holcim Innovation Hub
Lyon, France

1. PROFESSIONAL CATEGORIES

Projects must–

- Be located in Bangladesh
- Real world projects completed within last 5 years Or $\geq 50\%$ constructed
- Be led by a IEB (full member & above) structural engineer
- Comply with BNBC and regulatory approvals

2. NEXT GENERATION CATEGORIES

- Open to final year students, early career structural engineers (upto IEB associate member)

SUBMISSION REQUIREMENT

Project Narrative

- 1-page Concept /Executive Summary
- Sustainability Metrics (CO2 Reduction %)

Technical Submission

- Structural drawings (PDF)-A3 page
- Architectural design 3D view
- Plan & Elevation
- Architectural Section & Floor Plan
- Design demonstration (5 page max)
- Software model snapshots
- Visit Website for all details

TIMELINE OF HSEA

LAUNCH SEP 26

- Press Launch in 2nd September
- Submission opens

**SUBMISSION
SEPT-OCT 26**

- Submission of all required documentations
- Keep eye on web portal

**TECHNICAL
PRE-SCREENING
NOV 26**

- Pre screen & shortlist by committee

**Jury Evaluation
Dec 26**

- 3-5 projects per criteria
- Shortlisted projects will be invited for presentation

**Gala Night
Jan 27**

- Award & winning projects showcase

**STRUCTURAL
EXCELLENCE
AWARDS 2026**

MEET THE JURY

Dr. Raquib Ahsan
Professor

Dept. of Civil Engineering, BUET

Dr. Raquib Ahsan, Professor of Civil Engineering at BUET, holds a Ph.D. from University of Tokyo with 30+ years of expertise in academia, research, consultancy and structural engineering. A key stakeholder of updating Bangladesh National Building Code (BNBC) and former director of BUET- Japan Institute of Disaster Prevention and Urban Safety (JIDPUS), he played a leading role in organizing major national and international events on disaster risk management. His extensive research spans structural retrofitting, soil, seismic vulnerability assessment, disaster preparedness and related disciplines. He has authored numerous publications and contributed extensively to national communities like RAJUK, PWD.

**Major General (Retd.)
Nizam Ahmed**

Executive Director, Ananta Group

Major General (Retd.) Nizam Ahmed is a retired high-ranking Bangladesh Army officer who is currently serving as the Executive Director & Head of Development Works at Ananta Group. Prior to his business career, he served in the military for over three decades and held a position as the Board of Directors for Biman Bangladesh Airlines. Formerly he was the Head of Facilities Management at icddr,b and the Chairman of Benfix Steel Building Development Limited.

**Engr. Abdullah Al Hossain
Chowdhury**
MD & Lead

Design Engineer, Inter Space Limited

Abdullah Al Hossain Chowdhury (Rizvi), PEng, is the Managing Director and Lead Design Engineer of Inter Space Limited with over 33 years of professional experience, expertising in the analysis and design of high rise buildings. A BUET graduate and IEB Fellow, he has engineered numerous landmark tall buildings shaping Bangladesh's skyline. As a life time member of ACECOMS (AIT), Bangkok, a member of the Bangladesh Earthquake Society (BES), as convener and founding member of BASE he continues to contribute to design excellence, research, professional development, and knowledge-sharing within the engineering community.

Engr. A.K.M. Saiful Bari
(P.Eng, BUET)

Managing Director, SB Consultant LTD

Engr. A.K.M. Saiful Bari, PEng, Managing Director of SB Consultant Ltd., is a BUET graduate with nearly 35 years of structural engineering expertise. An IEB Fellow, he has engineered iconic mega-structures, including the 50-storied World Trade Centre Dhaka, 40 storied Pinnacle, Evercare Hospital and many more. His vast portfolio spans skyscraper, industrial steel complexes, marine projects, power plants and so on. A benchmark of technical authority and innovation, his work continues to shape Bangladesh's built environment.

Lt Col Dr. Khondaker Sakil Ahmed,
PhD, PEng, CEng, FICE
Associate Professor,
Dept. of Civil Engineering, MIST

Lt Col Dr. Khondaker Sakil Ahmed, PEng, is a Civil & Structural Engineering expert with 20 years of global experience across Bangladesh, Singapore, and Africa. A PhD/Post-Doc graduate from NUS, Chartered Engineer (UK), and ICE Fellow, he is currently working as an Associate as Professor at MIST and Secretary of ICE Bangladesh Chapter. His expertise spans tall buildings, bridges, finite element analysis, and hazard-resistant designs, with major leadership roles on landmark projects in home & abroad. Dr Ahmed possesses in depth knowledge in Structural Engineering, Research and Industrial Projects.
